#### DETAILED ACTION

Claims 1-15 are presented.

## Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 1 recites the limitation "said proxy web service" in line

3. There is insufficient antecedent basis for this limitation in the claim.

Claim 2 recites the limitation "the capture mode" in line 6.

There is insufficient antecedent basis for this limitation in the claim.

Claim 4 recites the limitation "the hidden" in line 3. There is insufficient antecedent basis for this limitation in the claim.

Claim 5 recites the limitation "the generated proxy" in line 11.

There is insufficient antecedent basis for this limitation in the claim.

Claim 6 recites the limitation "the caller" in line 11. There is insufficient antecedent basis for this limitation in the claim.

Claim 15 recites the limitation "said proxy web service" in line

3. There is insufficient antecedent basis for this limitation in the claim.

Claim 15 recites the limitation "said request" in line 8. There is insufficient antecedent basis for this limitation in the claim.

### Claim Objections

Claim 5 is objected to because of the following informalities: "extracted portion P1 is will be having". Appropriate correction is required.

## Specification

The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See  $37CFR\ 1.75(d)(1)$  and MPEP § 608.01(o). Correction of the

following is required: R1 and P1 in claim 5, line 9 have no proper antecedent basis in the specification.

# Allowable Subject Matter

Claims 1-15 will are allowable if the above 112 rejections and the objection are overcome.

The following is an examiner's statement of reasons for allowance: None of the prior art of record teaches or suggests a method and system of generating a proxy web site for wireless devices with micro browser supporting a second markup language, based on the user's interaction with corresponding conventional web site, the user interacts with the conventional web site in a browser simulator, the data flowing in and out of the simulator is captured, the user selects the desired output for wireless device by highlighting it in the simulator, the generated web services provide a user interface for wireless devices to capture the data that is passed to conventional web service, receive the data from wireless devices and dynamically generate request to conventional site with the data, generate a request object code in the proxy web service to make web request to the destination URL of the web request captured in the simulator,

selecting a matching pattern rule within a plurality of pattern rules to canonically extract the desired content within the result page of the web request in the simulator and appending the object code for extraction from the selected pattern rule to the proxy web service to extract the desired data from the result of the web request and formatting the desired data extracted in a second markup language using a predefined mappings within plurality of mappings.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
